

## Easy Card Layout Project Sheet

Supplies:

**Step 1:** Start with a base of solid cardstock. This will be the foundation of your card and can be any color that complements your DSP.

**Step 2:** Choose a piece of your favorite DSP and cut it slightly smaller than your card base. This creates a lovely framed effect and lets both the base and the pattern shine.

**Step 3:** Add an accent. This could be anything from a stamped image, a die-cut shape, a button, or even a simple bow.

Check out my video on YouTube to see these cards being made:
