

## Project Sheet: Easy Weaving Technique

Paper weaving is one of those techniques that brings back instant memories of grade school projects—but it turns out it makes beautiful handmade cards too. Using simple strips of patterned paper, you can create woven backgrounds that add texture, color, and interest without needing complicated tools or techniques.

### Supplies:

Card Base :: 8-1/2" x 5-1/2"

Cardstock :: 4" x 5-1/4"

Copy Paper :: 4-1/2" x 2"

DSP strips :: 1/2" x 4-1/4" (X9)

DSP strips :: 1/2" x 5-1/2" (X6)

Accent/Sentiment piece

### Instructions: *(watch the video for more detailed instructions)*

1. Score the card base in half and fold.
2. Put a line of adhesive along one of the longer edges of the copy paper. Adhere the edges of the longer DSP strips on the copy paper. Then start weaving in the shorter strips. Adhere this on the 4" x 5-1/4" cardstock mat making sure to put adhesive all around the edges. Trim off the excess for a cleaner look and adhere on the card base.
3. Add your accent and sentiment piece.
